Pony Pals for Schools

As part of our Pony Pals program, we offer Pony Pals for Schools; an interactive program that promotes knowledge and understanding of the different aspects of horse safety and care. The program is tailored to developmental level and is suitable for children ages 4 and up. The program can be delivered at schools or child care centres and can also be hosted at Horseshoe Park as an excursion based exercise.

We customise the program according to client's needs and work with you to develop a lesson plan according to requirements, child numbers, and developmental level. As a guide, the program is designed to be delivered in 3 hour block sessions, with each session accommodating for a maximum of 60 children. Additional sessions can be booked on the same day if needed.

The lessons can involve general education about horses, as well as education specific to equine husbandry, horse care and grooming, equine behaviour and safety, as well as general anatomy/physiology, health and nutrition. Depending on your requests the lesson can be lecture based, as well as interactive. The children can have the opportunity to groom and feed the ponies, and where appropriate they can participate in a pony ride.

The cost varies depending on requirements and an itemised quote can be provided upon request. For further enquiries, to request a quote or to make a booking, please contact us at info@horseshoeparkponyrides.com.
